

Email 1: Introduction Email

Subject: One stream. More places to be seen.

Hi [Name],

I came across your content, and honestly, it's impressive.

You can tell you're not just posting for the sake of it. There's real thought, effort, and consistency behind what you're creating.

That's exactly why I wanted to share OneStream Live.

When your content is already strong, it should show up everywhere.

With OneStream Live, you can create a single stream and send it to multiple destinations, including YouTube, Facebook, TikTok, Instagram, LinkedIn, Twitch, and the web.

So instead of setting everything up again and again, your content gets more room to move.

Here's the real win:

- One stream setup
- Multiple destinations
- More chances to be seen
- More value from the content you already created

No tab chaos.

No rebuilding the same stream five different ways.

No making one platform carry the whole show.

Email 2: Why I Recommend OneStream Live

Platform Specific Outreach

Subject: One tool I'd actually recommend

Hi [Name],

[Platform] is a strong platform for building an audience.

But it should not be the only place your stream gets a chance to be seen.

That's where **OneStream Live** comes in.

You can keep [Platform] as your main stage and send the same stream to other destinations, such as YouTube, Facebook, TikTok, Instagram, LinkedIn, Twitch, and the web.

So instead of creating the same live setup over and over, you run a single stream and let it propagate.

That matters because attention is scattered now.

People scroll fast. Algorithms shift. Some followers miss the live window completely.

OneStream Live gives your content more chances to reach the right people while the moment is still fresh.

Use this if you want:

- more reach from one stream
- less platform-hopping
- a cleaner setup
- more control over where your content appears

Email 3: Getting Started Email

Subject: Start with one stream, not five tabs

Hi [Name],

If streaming to multiple platforms sounds complicated, it doesn't have to be.

That's the point of OneStream Live.

You do not need to open five platforms, copy five stream keys, and pray nothing breaks.

Here's the super simple flow:

1. Create your account

Start here: [Insert Affiliate Link]

2. Connect your destinations

Pick where you want to show up, from major social platforms to the web.

Need help, contact us at: partners@onestream.live

Made with ❤️ by OneStream Live

3. Choose your stream type

Go live in real time, use an encoder like OBS, or schedule a recorded video as a live stream. That's it.

You can start small. Test one stream. Add more destinations when you're ready.

Just set it up, go live, and let OneStream Live handle the distribution.

Take a quick look before you try it

Email 4:Features

Subject: Top 5 Things You Can Do with OneStream Live

Hey [Name],

Multistreaming is just the start.

Here's what else you can do with OneStream Live, and how smart creators are using it to grow faster, stay visible, and save time:

Need help, contact us at: partners@onestream.live

Made with  by OneStream Live

1. Restream from External RTMP Encoders

Already using OBS, vMix, or a hardware encoder? Just connect it to OneStream Live to split your feed and stream it anywhere you want—on social platforms, on hosted live pages, or to custom RTMP destinations.

- *Perfect for:* gamers, advanced streamers, studios, and agencies.

2. Schedule Pre-Recorded Videos with Auto Captions

Record once, edit until it's perfect, and schedule it to go live anytime—even while you sleep. You can loop a single video, chain multiple clips into a playlist, and easily generate auto captions and subtitles to make your recorded broadcasts fully accessible.

- *Perfect for:* educators, coaches, content creators, and businesses.

3. Custom Websites + Stream Players

Don't send your audience to a noisy social feed. Create a custom website with no external hosting or domain needed, or embed your stream directly on your website, landing page, or blog.

Perfect for: course creators, SaaS brands, and product launches.

4. Host Real-Time Events in the Cloud

No heavy downloads required—go live directly from your browser. Bring in guests with easy co-hosting links, manage an interactive split-screen layout, and engage with a unified chat from all your social channels in one place.

- *Perfect for:* podcasts, interviews, webinars, and online panels.

5. Brand Your Streams & Drive Live Sales

Make your stream feel like a professional show. You can switch smoothly between pre-set scenes (intros, outros, screen shares) and add overlays, logos, and lower thirds. Plus, you can use Live Sales to display clickable product links, offers, or QR codes right over your broadcast feed.

Need help, contact us at: partners@onestream.live

Made with ❤️ by OneStream Live

- *Perfect for:* e-commerce brands, creators with sponsors, and marketers.

All of this is available from one clean, easy-to-use dashboard.
